

How to Setup Your Twitter Account and Mobile Notifications

1. Go to <http://twitter.com/>
2. If you have an existing account, please sign in at the top right of the screen and skip to **Step 6**. If you do not have an existing account, continue to the next step.
NOTE: The appearance of the pages may differ depending on your browser/version.
3. To create a new account, please enter your name, an existing e-mail address and password.

4. Confirm settings on the next screen and click "Create my Account." It will verify that the e-mail has not been associated with another account and if the username is available (and will suggest one if it's not). Record your logon information for future reference. Skip any setup/tutorial pages until you get to your home screen.

A screenshot of the Twitter account creation confirmation screen. The top left features the Twitter logo and the text 'It's your turn. Join Twitter.' The top right has a 'Have an account? Sign in' link. The main area contains four input fields with validation feedback: 'baseballtest' (Name looks great), 'youreiladdress@aol.com' (We will email you a confirmation), a password field with a strength indicator (Password is okay), and 'baseballtest' (Username is available). Below these fields is a checked checkbox for 'Keep me logged-in on this computer.' At the bottom, there is a 'Create my account' button and a section for terms of service with links to 'Terms of Service' and 'Privacy Policy'.

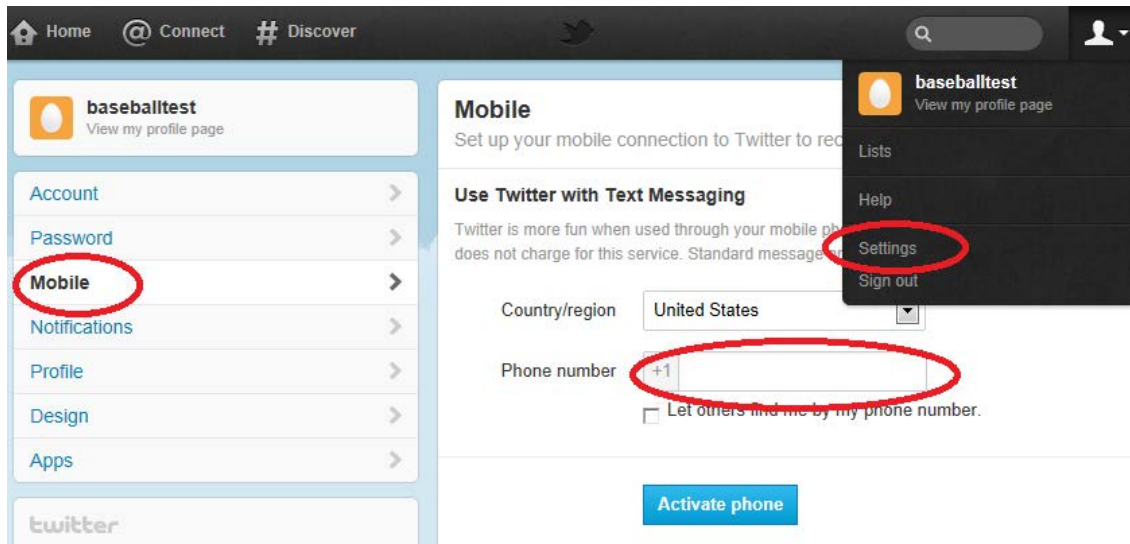

5. Logon to the e-mail you supplied to confirm your new Twitter account. Once confirmed, proceed to Step 6.
6. While logged on to your Twitter account (log out/back in if necessary), go the Stony Point 2012 Twitter page by following the link below (or pasting it to your internet browser). Click "Follow."
<https://twitter.com/#!/spbaseball2012>

7. You are now set up to receive Tweets from the Stony Point Baseball Twitter account. You may also set up mobile phone notifications so you can also receive a text whenever a Tweet is sent.

Mobile Notifications

8. To set up mobile notifications, click the icon (or username) with the down-arrow and choose "Settings" from the drop down menu. Choose "Mobile" and then enter your phone information.

- Instructions will follow to complete the setup, which will include sending a confirmation text from the phone number you provided. Modify the settings to your personal preferences and click "Save." If you are unsure of which options to choose, here are some suggested settings which will allow you to specify which Tweets should also send texts. You can also choose "Sleep Settings" to not receive texts during a specified time window.

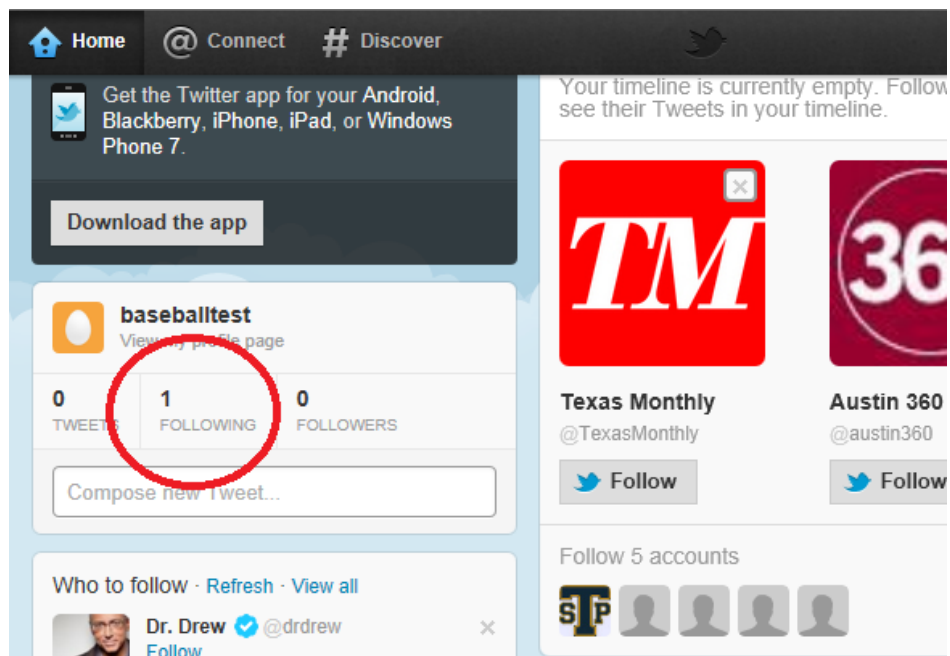

Suggested Settings - check the following boxes:

- Tweets from people you've enabled for mobile notifications
- Direct Messages

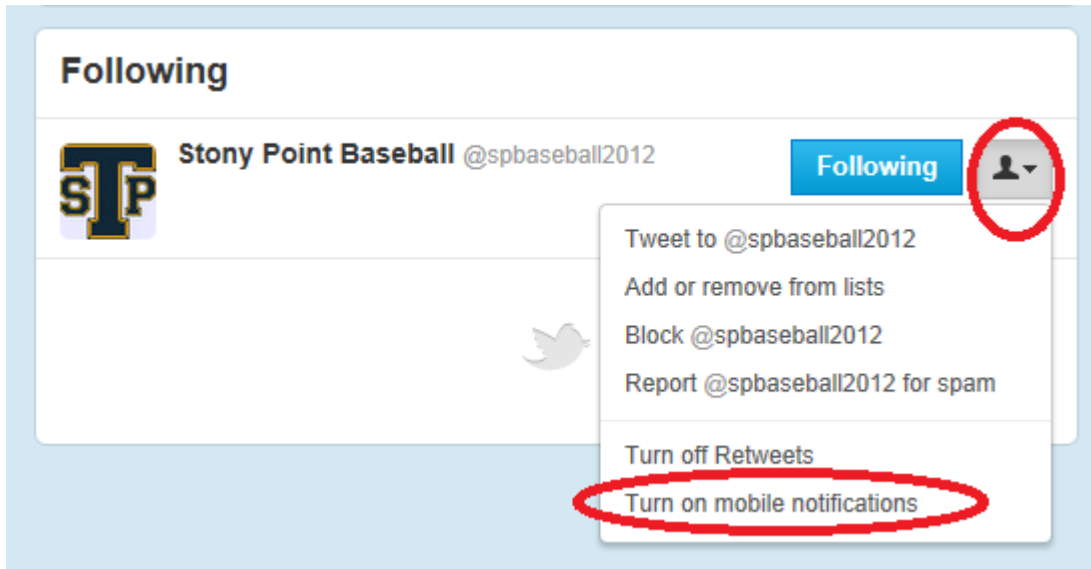

Optional:

- Sleep Settings - check the "Turn off updates during these hours" box and enter your preferred time window.

- Go to your HOME (link at top of the page) and then click "Following." (Reminder look/location may differ depending on browser)

11. From the "Following" list, click the icon with the drop-down arrow (the one associated with spbaseball2012) and then choose "Turn on mobile notifications." Other versions of the browser may show a small mobile phone icon instead of the drop down box.

12. You should now be setup to receive Tweets and texts.
